

# SPECTRUM 5452 | 104 DAY MATURITY

## HYBRID PROFILE

### PLACEMENT CONSIDERATIONS

- Great performer on silty loam soils, clay, and even sandy
- Prefers your rotated acres

### AGRONOMIC FEATURES

- Impressive root system and great defenses in drought-like environments
- Impressive defenses against Northern Leaf Blight and Goss' Wilt

### MANAGEMENT RECOMMENDATIONS

- Check moisture before harvest
- Ideal for those acres you want to manage for silage

### RATINGS

PLACEMENT	
SILTY LOAM	9
CLAY	9
SAND	8
NARROW ROWS	7
CORN AFTER CORN	6
NO TILL	7

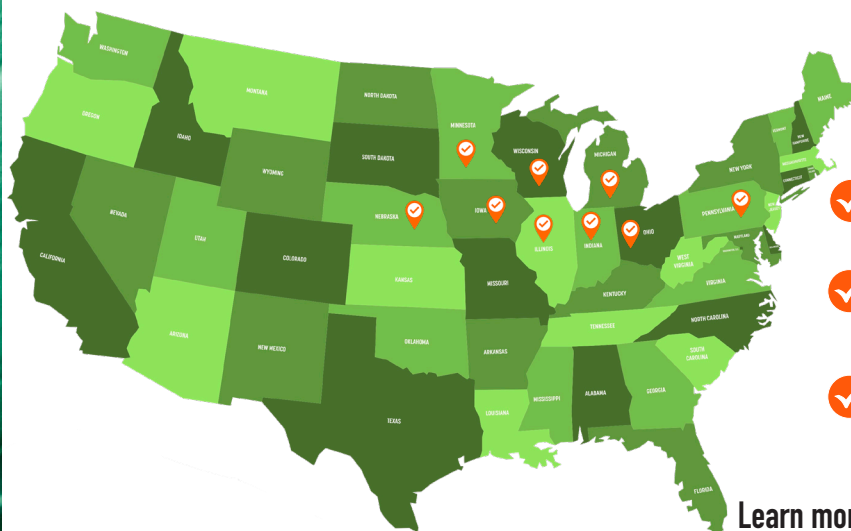

AGRONOMICS	
EMERGENCE	7
EARLY VIGOR	7
